Roman Belopolsky

UI/UX Designer & Developer

Lead UI/UX Designer & Developer

Oct 2019 - Present

Wild Alaskan Company

Brooklyn, NY

- Mobile onboarding flow Designed and implemented mobile-first onboarding flow that incorporated mobile usability standards and UX patterns derived from research and competitive analysis.
- Deactivation flow Created a system that promotes transparency and ease of use, leaves a positive lasting impression on members, and saves MX teams hours of manual work
- Issue tracking Distilled a complex series of actions and siloed data entry into an
 easy to use custom tool for our MX team. Saved MX hours of manual work, allowed
 members to get the resolutions they need quickly and allows the business to have a
 centralized data bank of every type of issue and the impact it has on revenue.
- Development of a design system, a brand guide and reusable global vue components that allow us to quickly wireframe, iterate and release new flows that have consistent UI elements and design patterns
- Experience as a stakeholder across all design initiatives. Working cross-functionally with marketing, growth, operations, product and tech.
- Member dashboard, which allows members to visualize and customize current and future orders in a simple and digestible view.
- Fun stuff: redesigned shipment box and product labels to help move physical product closer to digital product and overall brand revamp.

Senior UX/UI Designer & Developer iGain LLC

Mar 2018 - May 2019

New York, NY

- $\quad \text{Created user journey maps to illustrate user \& business goals across a variety of products} \\$
- Worked to establish clear brand guidelines and gave all products a consistent visual identity under the umbrella of our new company
- Implemented UX updates to newly acquired products that improved acquisition and retention rates based on years of research and results collected from our main product
- Collaborated with team leaders across all products in weekly meetings to communicate UX and design goals
- Worked with social media teams to establish clear tone and visual identity as well as across channels

UX/UI Designer & Developer

Feb 2013 - Feb 2018

SayForExample LLC

New York, NY

- Redesigned brand identity to improve perceived brand value and trustworthiness
- Rearchitected website to be responsive and cross-browser friendly
- Greatly improved mobile experience, increased retention rate for mobile users, and leveled key usability metrics like bounce and exit rates across all major browsers
- A/B + MV tested various registration flows to refine user experience and increase end
 of funnel conversions and revenue
- Designed and rolled out unique onboarding flow to improve day 1 retention rates and increase average session durations
- Designed and introduced a reward program to add unique brand value and improve active user satisfaction by alleviating frustration at key pain points in user experience
- Acted as UX advocate in cross-functional team meetings to explain the reasoning behind the need for new features, design and UX improvements
